MORIROKU TECHNOLOGY INDIA PVT. LTD.

350 YEAR HISTORY

The Moriroku Group was founded in 1663. Over time, we have created new value while constantly anticipating the needs of society and boldly tackling the challenges of new business domains and markets. and completed 350 Yrs.

1663 MORIROKU GROUP WAS FOUNDED

The origin of Moriroku Group can be traced to our dealings in plant-derived Awa indigo dyestuff and manure used to cultivate those plants.

STARTED DOING BUSINESS IN INDIA 1909

We began importing and selling Indian-made indigo dyestuff, which was both less expensive and of higher quality than their Japanese counterparts. Eventually, synthetic dyes became the mainstream, and we started doing business in that area as well.

1958 ENTERED MANUFACTURING BUSINESS

Having succeeded in the resinification of exterior parts of two-wheeled vehicles that had been previously made of metal, we started supplying those parts to Honda, and entered the resin parts manufacturing business.

VEHICLE PART DELIVERY COMMENCED 1963

Once Honda began manufacturing & selling four-wheeled vehicles on full scale, we followed suit by commencing deliveries of resin parts of four-wheeled vehicles.

1980 EXPANDED GLOBALLY

We established overseas corporations in regions such as Hong Kong and the US, and have since proceeded to accelerate the development of our global business.

ESTABLISHED MUI (NOW KNOWN AS MTI) 1996

Accompanying our customer's foray into the Indian market, we established MUI in India. It was Moriroku Group's fourth overseas production base, via a joint venture with the locally based UT Ltd. We commenced mass production in October 1997.

2015 ESTABLISHED MTI KAHRANI

After having established ourselves globally, we envisioned and executed our customer venture into the Indian market by establishing MTI in India.

Business Activities

Moriroku India Technology ventures in a wide range of automobile technology including molded parts, external & internal parts & hand wrapping parts.

With our focus in delivering products with high precision, we have been able to build a strong relationship with our stake holders. Our high-quality manufacturing efforts are guided by our strong leadership and robust management style, which uses the PDCA approach for shop floor management.

We make full use of advanced automated tools and machines, which are cultivated through our 350 year history in vehicle parts manufacturing. In association with our parent company in Japan, Moriroku Group, we handle the complete process of automobile part manufacturing, from design and development, to delivery. Our advanced capability in R&D entails us to simultaneously work towards enhancing the product quality. This is reinforced by the various certifications possessed by us. We have realized competitive cost performance through highly-efficient development efforts, in our areas of specialization.

Moriroku India Specilised Part: Center Panel & Outlet

Out of all the various automobile parts that we manufacture, we specialize in manufacturing the Outlet part, i.e. the Center Panel consisting of the AC Vents.

Our Outlet part has been acclaimed by our prime customer Honda Automobiles, who is using it in a majority of their cars. The superior finish coupled with modern designing enables us to be a step forward than our competitors.

Two Wheeler Parts

Moriroku India Technology manufacturers a wide range of parts for two wheelers.

Over the years, our company has achieved an impeccable reputation in terms of quality, reliability and delivery for the manufacture and the paint job for two wheeler parts.

We specialise in manufacturing the Cover RR Center Lower/ Visor FR, Handle Cover and Cover FR L Body. We have readiness to accept new technology & ability to supply quality assured products.
