

**NIK INFOTECH**

## **ABOUT US**

Nik Infotech has set out itself to be a fast emerging company, providing comprehensive and tailored security and solar energy solutions. We are situated in Delhi and execute operations across North India.

Our company follows an integrated approach, enabling us to be able to provide and support upon all aspects of security solutions. Our scope of work covers Computer & Networking, CCTV Installation, CCTV Surveillance (setup of control room) and ITMS. We also provide our customers solar energy solutions, which include the Solar Rooftop Panel Installation. Our on-field experience, which is acquired since a considerable time, has positioned our company as a reliable provider and wholesaler, within the security industry landscape.

Nik Infotech works with the highest efficiency and in accordance with the latest technologies in conformity with international standards of quality, security and safety. Each project is closely examined throughout the process of setting up a security solution for the client.

We work with clients of mixed background, having both small and large business sizes. Nik Infotech has organized its personnel in such a way, that it ensures providing honest and reliable services to the clients with satisfactory support. We utilize trained and experienced staff for the application and delivery of projects with commitment. The staff at Nik Infotech receive timely training and are adaptable to our clients, in line with the best security industry practice.

Besides the rigorous selection of its equipment, staff and partners, Nik Infotech's success lies in developing long-term relationships with the clients in order to provide quality security services accustomed to their needs and budget.

We execute all projects in accordance with the technical and financial strategies to fit the distinctive need of a client as per the need of the hour. The company believes in generating maximum benefits for its customers.

## COMPUTER & NETWORKING

Nik Infotech takes pride in its implementations of providing solutions from scratch that come under the umbrella of Computer and Networking. Even if you have an existing networking solution, our network support capabilities provide assurance that your IT network problems will be a thing of the past. As a network support company, Nik Infotech eliminates its client's stress that normally follows resolving network related issues. Our certified IT professionals have done consulting work for companies of all sizes to help prevent wasted time, frustrated employees, and lost revenue.

We setup advanced solutions accustomed to your IT environment to enhance business productivity. Our in-house team is available 24/7 to monitor and resolve guidance-related issues. All of this is ensured with routing and switching, security devices and firewalls, WAN optimization, VoIP & Unified Communications, Wireless, IPsec & SSL VPN, Quality of Service (QoS), Cisco Expertise, etc. Nik Infotech assures withstand commitment whenever it provides any service to its customers. The priority is customer's feedback and satisfaction above all the other things.

## CCTV INSTALLATION

Nik Infotech is well-recognized for providing video installation solutions that an organization or individual may require to improve safety and peace of mind through intelligent video insights.

Security system installation has been made much easier with our complete surveillance packages and all types of high-capacity cameras including CCTV dome cameras and Bullet CCTV cameras. Nik Infotech comes up with suitable technology according to the client's specifications and requirements. Having a huge range of devices like eyeball cameras, night vision cameras, auto tracking cameras, specialty lenses, NVRs and siamese cable, we are capable of satisfying all-purposes and pre-conditions that a client might come up with. Nik Infotech has become a security industry expert because of its ability to come up with the most competitive pricing possible on our CCTV installation. Catering to the need of suitable CCTV equipment is one thing. Apart from that, Nik Info tech strives to deliver quality installation as well. Furthermore, we are one call away for delivering the assistance and technical support to the clients.

---

## CCTV SURVEILLANCE (SETUP OF CONTROL ROOM)

We firmly believe that CCTV surveillance makes enterprises more efficient and better performers and thus, we go hand in hand with the advanced solutions that need to be delivered to the clients. Nik Infotech provides modular and space-efficient control room design for any utility. Keeping an eye on operations becomes far easier and more effective as our skilled personnel know, how to make the whole setup suitable from the perspective of location, space, and usability. No matter how big the work space is, we assure that the client is able to meet its need and purpose. We carry expertise and capability to seamlessly create a central space for you to monitor and control the physically dispersed area.

Our certificated technical professionals cater to consultancy for supervising multiple systems at a time for your business. We also keep in mind those certain factors that can make or break the effectiveness and overall purpose of setting up the control room. The factors that are taken care of while planning and executing the setup are: right kind of light and noise control. It is also ensured that lines of sights are clear enough for the supervisor to monitor the physically dispersed activity.

## **ITMS**

Nik Infotech also provides Intelligent Traffic Management System (ITMS) services across the country. The security system that we build under the ITMS category comprises a whole package, consisting of: a traffic control center, a traffic information service center, a cellular mobile communication system and GPS trackers, which are connected with each other via a wireless communication network (satellites/telecom towers).

Our clientele appreciates the efforts and fine skills that we put to use. Our ITMS solutions help in controlling signal lights, thereby ensuring smooth vehicle flow. Moreover, we provide accessibility to real-time information that helps in reducing air pollution as well as road accidents. The in-vehicle terminal communicates with the traffic control center and the traffic information service center respectively. All of this communication is performed via satellite or telecom towers. This complete package as mentioned above, is provided with an aim to make this service cost-effective for the clients. Opting this package for an intelligent traffic monitoring system, its installation and construction cost gets reduced appreciably.

## **SOLAR INSTALLATION**

Nik Infotech is at the forefront of energy transition, integrating renewable power with smart energy storage. The company offers utility-scale solar services and team configurations which are customized to meet the demands of each client project. Whether you need an on-demand scheduled assistance or unscheduled maintenance services, our highly trained team are ready to deliver satisfactory results that are going to seamlessly integrate into your organization.

Our clients expect, and we deliver, safety trained solar experts that know what needs to be done, how it needs to be done, safely, and within budget. Our teams understand that our performance has a direct impact on our client's success and they are here to serve their interests and maintain the strong reputation that Nik Infotech has built by delivering impeccable results. We offer a one-stop solution from design and engineering to permitting support services to fit your project requirements. Our specialization lies in the development of solar pv plan sets.

As Nik Infotech grows as a company, it has become more and more important to explicitly define the core values from which we develop our brand and our business strategies. These are the four key values that we live by:

#### **PROFESSIONALISM**

We strongly believe in being professional and cohere our work with our ethical standards.

#### **DISCRETION**

The protection of customer concerns and data is always a high priority and remains intact at all times. All project data is in encrypted form and only people who are assigned to the project get access to it during the time of execution. The protection of the customer's privacy and its data security has always been our highest priority.

#### **RELIABILITY**

The authenticity of the solutions that we provide is because of our belief in serving society as a whole.

#### **QUALITY**

For us, quality must be blended in every action that we take as company and in every project we do with our customers. We are not just a service provider, but a long-term partner for our clients.
