**LINEN**

QUALITY NEVER GOES OUT OF STYLE

# LINEN

Linen fabric is made from the fibers of the flax plant which can be bought online. The constituent material for linen fabric is the cellulose fiber found in the stems of linen plants. Like the stalks of many similar plants, linen stalks consist of a woody, reedy interior section and a fibrous, stringy exterior section.

Cotton linen fabric feels cool to touch and has a higher conductivity. This fabric is known as the world's strongest natural fiber and is far more durable than cotton.

## MAIN CHARACTERISTICS

- > **Durable**
- > **Easy to care for**
- > **Hypoallergenic**
- > **Suitable for every season**
- > **Versatile**
- > **Sustainable fashion**
- > **Comfortable**

Linen is highly breathable, durable and has the ability to absorb moisture in extreme climatic conditions.
