In his leadership company got various awards from global leaders in equipment manufacturing. Since the establishment of Systematic Communication Pvt. Ltd. in the year 2002, he has relied on strategic decision making and innovative thinking to foster growth and development of the company, steering the company on the path of success.

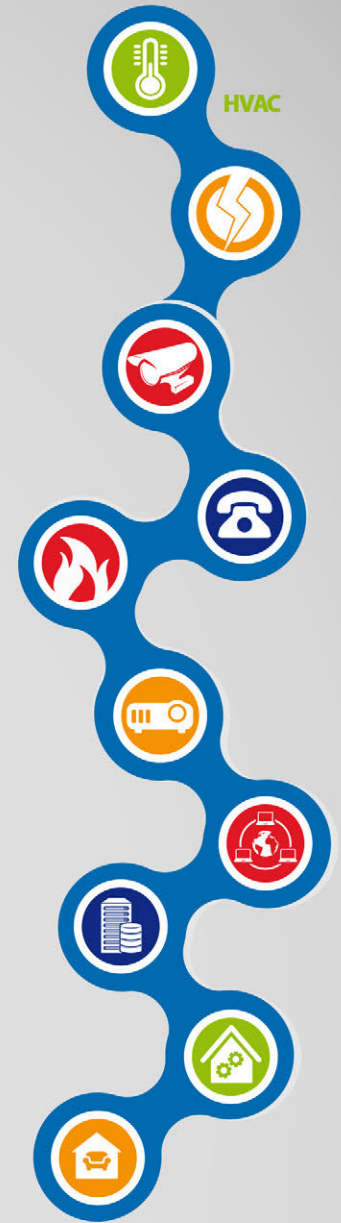

# HEATING, VENTILATION & AIR CONDITIONING (HVAC)

We at Systematic Communication, are experts in providing the HVAC technology for indoor and vehicular environmental comfort. Our goal is to provide thermal comfort and acceptable indoor air quality.

We have installed HVAC systems in numerous medium to large industrial and office buildings such as skyscrapers and hospitals, apartment buildings, hotels and in marine environments, where safe and healthy building conditions are regulated with respect to temperature and humidity, using fresh air from outdoors.

Our HVAC units exchange air in any space to provide high indoor air quality, which involves temperature control, oxygen replenishment, and removal of moisture, odors, smoke, heat, dust, airborne bacteria, carbon dioxide, and other gases. Ventilation removes unpleasant smells and excessive moisture, introduces outside air, keeps interior building air circulating, and prevents stagnation of the interior air.

Ventilation includes both the exchange of air to the outside as well as circulation of air within the building. It is one of the most important factors for maintaining acceptable indoor air quality in offices and buildings.

## DATA CENTER SOLUTIONS

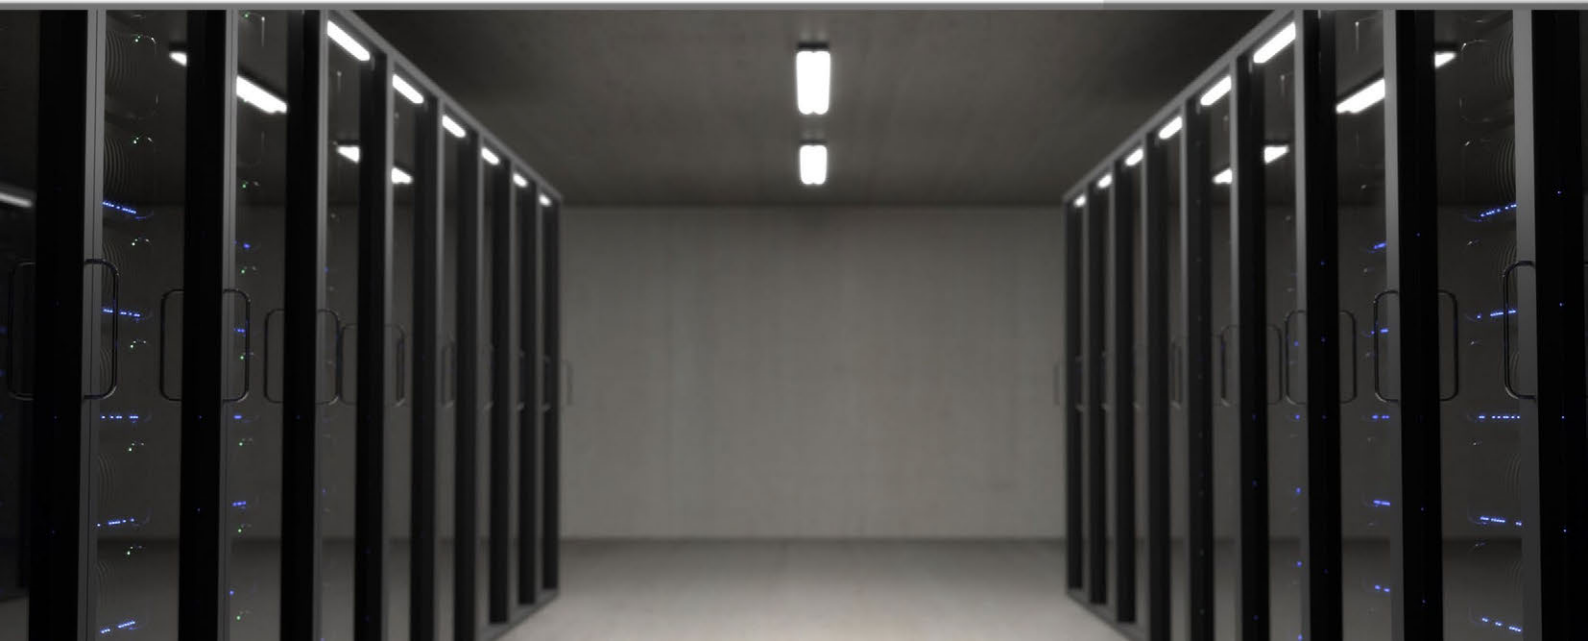

Any downtime or power failure can result in massive financial losses and poor business performance. This is one of the major reasons why organizations must set up robust, scalable and efficient data centers, storage and servers systems that further enable them in boosting their performance.

Systematic Communication is the premier provider of Data Centers of robust, scalable and flexible solutions that allow enterprises to run and manage their mission critical data and applications with ease. We provide tier 3 and tier 4 data center solutions, deploying hardware within our client's data center that offer complete redundancy. With our tier 3 data center hardware configuration, clients can manage their maintenance works without impacting the servers' continuity.

With such solutions, enterprises can enjoy partial redundancy of up to 99.98%. On the other hand, we also offer tier 4 data center solutions, which impart the highest level of safety for an organization's data center, since it is built for withstanding floods, earthquakes, fires and floods and other serious incidents. The tier 4 data center architecture is fully robust as far as its cooling, electrical circuits and network is concerned, providing 99.999% availability. Our tier 4 data center solutions feature quite a few physical security aspects that protects an organization's data against human or physical intrusions.
