BUSINESS EVENTS

Business Events:

Business events come in the form of Meetings, RTC's, conferences and exhibitions. An important means of bringing professionals together to share interests, explore issues and generate new ideas, which very often leads to further collaboration and innovation. It promotes the exchange of information in industry best practice, latest technologies and leading research.

Conferences:

Our Conferences provide a platform to the industry experts to share their views on the recent developments in the particular sector. Moreover participants will have a chance to exchange their ideas.

RTC:

The Round Table Conferences generally happen on the burning or current issues of the industry. It is a half day program with (40 to 50 max.) industry experts gathering to share their views and working towards finding a suitable solution.

Workshops:

Our workshop provides a way to create an intensive educational experience in short span. These certified courses are self-contained informal and participatory with lots of case studies. These are designed for the training of lower, middle and senior level employees.

Exhibition:

Our Exhibitions will provide you a platform for direct product promotion, meeting Industry veteran in person. It will showcase and help you market the product to the right people.

Customized Events:

We customize Conferences targeting to your business preposition. The area of interest is converted into a fruitful discussion impanelling the set of experts recommended by the client. This is one of the most effective tool for market analysis.

DATA QUENCH

Diligentia Services' DATA QUENCH provides On-Demand authentic data which are made available to the user as needed. Data quench encompasses many things: Comprehensive data summaries on sporadic demand & scale of forecast, the competitors' profile and market share, the financial insight of the industry, policy updates and government initiatives.

We Compile, analysis and process the data and deliver it in the desired form. Compilation of the data is done through primary and secondary sources, news and various other modes. This is then analysed, filtered and enriched.

Delivery of data is done as business intelligence tool where you are leveraged to pool data either in real time to your system or ask for a customised form.
