DXBMACH

PACKAGING MACHINES

ABOUT US

OUR MACHINES ARE MANUFACTURED KEEPING ECO-FRIENDLY PRACTICES IN MIND

Zyva Global has earned a reputation of being one of the **leading manufacturers, suppliers, and exporters** of high quality packaging equipment for the packing industry. Our chain of packaging machinery is designed using **highly advanced forms of technology** and will attend to your unique business needs.

With over **10 years of experience** in the industry, we have succeeded in building an extraordinary customer base because of our top-notch selection of products and our **impeccable customer service**. Each machine is designed to cater to the unique needs of different industries, from food and beverages to pharmaceuticals & beyond.

OUR PHILOSOPHY

Operating under the distinguished brand name **DXBMACH**, we launch new machinery and equipment every now and then to suit the ever-**changing demands of the packaging industry**.

MISSION

To cater to the **evolving needs** of the food industry by adopting sustainable practices with limited **environmental ramifications**.

VISION

To **revolutionize the food industry** by delivering premium, cutting-edge machinery that focuses towards **innovation, precision and durability**.

COLLAR TYPE WEIGHER MACHINE

A BATCH-CODING DEVICE CAN ALSO BE INTEGRATED WITH THE DEVICE

COLLAR TYPE MULTIHEAD WEIGHER

Our machine comes with a multi-head weigher for weighing and sealing **fryms, chips, namkeen, grains**, snacks, pulses soya chunks, whole spices, pesticides, detergents, etc. The speed is **45 to 60 bags/ min** and the filling accuracy is quite high.

COLLAR TYPE FOUR HEAD WEIGHER

This automatic form fill and seal machine is perfect for filling grains and **free-flow powder products** like tea, sugar, rice, pulses, spices, detergents, pesticides, etc. The device has a centre sealing system that can fill **10 to 30 bags/ minute**. An optional batch coding device, batch cutting device, and **Z elevator** can be integrated. It works on a 5kw power supply.

COLLAR TYPE TWO HEAD WEIGHER

You can use our collar type two head weigher to weigh and fill items like **grains, pulses, tea, sugar, rice, namkeen, detergent powder, whole spices, pesticides**, etc. The packing range is **50g to 1 kg**, and the packing speed is around **8 to 14 pouches per minute**. The device also has various optional features like batch coding, batch cutting, and Z elevator.

COLLAR TYPE SERVO AUGER FILLER

IT ALSO COMES IN A WOODEN CAGE, WHICH ADDS TO ITS DURABILITY

COLLAR TYPE SERVO BAGGER AUGER FILLER

The collar type servo bagger auger filler from Zyva Global is the ultimate choice of machine for various industries. It can pack items like **spices, wheat flour, gram flour, ice cream powder, milk powder, pesticides**, etc. The machine has a speed of 40 to **60 PPM**. The filler can also be used with a batch coding device, screw conveyor, or batch cutting device.

COLLAR TYPE SERVO AUGER FILLER (HIGH SPEED)

Our high-speed filling and sealing machine can **fill up to 90 pouches per minute**. The exact speed depends on the nature of the product. The device is extremely efficient and serves multiple purposes. You can use the machine to fill items like spices, gram flour, ice cream powder, pharmaceutical powder, milk powder, pesticides, etc. **It runs on 5kw power**. The machine also has an elongated lifespan.

COLLAR TYPE WEIGHER MACHINE

THE EXACT SPEED OF PACKAGING DEPENDS ON THE NATURE OF THE MATERIAL

SEMI-PNEUMATIC SERVO AUGER FILLER / COLLAR TYPE FULLY PNEUMATIC SERVO AUGER FILLER

These two fillers are equally effective in sealing sticky powder products like wheat flour, coffee powder, milk powder, henna, pesticides, etc. They can fill around **30 to 45 pouches/minutes**. However, the collar type pneumatic servo auger filler is slightly higher in terms of filling range as compared to the semi-pneumatic servo auger filler. So, your choice of filler will depend on your packaging requirement. The machines are also designed as per industrial standards and are priced affordably.

SEMI AUTOMATIC CUP FILLER / COLLAR TYPE FULLY PNEUMATIC CUP FILLER

Our semi automatic and the collar type fully pneumatic cup fillers are known for their **efficiency and accuracy**. The machines can be used for filling grains and free-flow powder items like tea, coffee, rawa, wheat, detergent, pesticides in volumetric cup fillers. These machines can also be used in integration with a **batch coding device, batch cutting device, and gas flushing machine**.

F.F.S. MACHINE CUP FILLER

YOU CAN USE THE DEVICE ALONG WITH A BATCH CODING DEVICE

MECHANICAL F.F.S. MACHINE CUP FILLER

The device is effectively used for filling various dry free free-flowing products like sugar, salt, tea dust, detergent powder, whole spices, chemicals, bhujia, etc. It has a **capacity of 5g to 20g**. The accuracy is quite extraordinary. The machine can fill around **35 to 60 pouches** per minute. It also comes with an additional batch coding device.

MECHANICAL F.F.S. MACHINE PISTON FILLER

The mechanical F.F.S machine piston filler is perfect for **semi-liquid and free-flowing** liquids like shampoo, honey, oil, grease, paste, tomato puree, etc. It comes with a volumetric piston filling system, which has an excellent accuracy. The device can fill up to 100 ml. It also has a speed of **35 to 50** pouches per minute.

MULTI-TRACK LIQUID/SEMI-LIQUID PACKING MACHINE

This top-grade machine from Zyva Global fills liquid and semi-liquid products like oil, cream, ketchup, shampoo, pharmaceuticals, pesticides, etc. It has a four-side sealing type and can operate fast. The machine can pack around **50 to 100 stock per minute**. You can also use the device with a batch coding device, batch cutting device, auto lubrication system, gas flushing unit level sensor, and GMP model.

OTHERS

THE MACHINES ARE DURABLE AND CAN LAST FOR A LONG TIME

Other than the ones mentioned above, we also have an **exclusive range of other packing machines** available, each of which has its unique perks and specifications. These machines mostly run at an extremely fast speed and **have high efficiency**. The **power consumption is considerably low**. The packing machines use laminated film as packing material. So, you can choose your packing machine depending on your exact packing requirements and industrial needs.
